

OlyBond500[®]

INSULATION ADHESIVE

Insulation Adhesive & Productivity Tools

OlyBond[®] is the premier insulation adhesive for low-slope roofing applications. It is a fast-acting, two-component, low-rise polyurethane foam adhesive designed to secure most insulation types to a wide selection of common roof decks and materials. OlyBond Insulation Adhesives are easy to use, hassle-free and designed to get you off the roof and onto the next job quickly.

OLYBOND500[®]

OlyBond500 is available in Bag-in-Box sets (two 5-gallon containers [18.9 L each]), and in 1,500 ml SpotShot cartridges for easy application. OlyBond500 is dispensed through a portable 1:1 applicator in a semi-liquid bead that spreads to 3/4-in. to 1-in. (20mm to 25mm) above the substrate.

- **Regular Formula** (Bag-in-Box and SpotShot cartridge) – used in temperatures of 40°F (4°C) and risings.
- **Winter Grade** (SpotShot cartridges only) – used in temperatures of 0° to 65°F (-17° to 18°C).

OlyBond: The most trusted name in insulation attachment adhesive.

PACECART 3[™]

New, even more durable and easier to use, the patented PaceCart is the exclusive applicator for OlyBond500 Insulation Adhesive when using patented 5 gallon (18.9 L) Bag-in-Box containers (sets of two). The PaceCart is easy-to-use and maneuver on the roof and enables contractors to adhere up to 60 squares (557m²) of insulation per hour.

- New manifold is ergonomically designed for applying two-part adhesives and is grease free, simplifying start-up and shut down procedures for rooftop time savings.
- New robust pumps are designed for use with high viscosity liquids, and minimize maintenance requirements for increased up-time and productivity.
- Patented dispensing system and Bag-in-Box technology are designed to work together to maximize production.
- Fastest low-pressure application method on the market, provides the lowest installed cost method of application in the industry.
- Color coded trays minimize the chance of cross contaminating Part 1 and Part 2 dispensing lines.
- An easy to see and read volt meter lets contractors know if the incoming power is insufficient to operate the PaceCart 3.
- Each PaceCart 3 is generator ready with a built in shelf designed to hold a portable generator (sold separately). On larger production projects this provides contractors with improved and cord-free mobility, eliminating a potential trip hazard.
- Includes 30-ft. (9m) hose for maximum reach and maneuverability on the roof.
- Easy to operate and maintain.

SPOTSHOT CARTRIDGE APPLICATORS

For projects that don't require a PaceCart, OMG Roofing Products offers a choice of hand-held applicators designed exclusively for use with OlyBond SpotShot cartridges. SpotShot is ideal for smaller projects, hard to reach areas and repair work.

HAND APPLICATOR

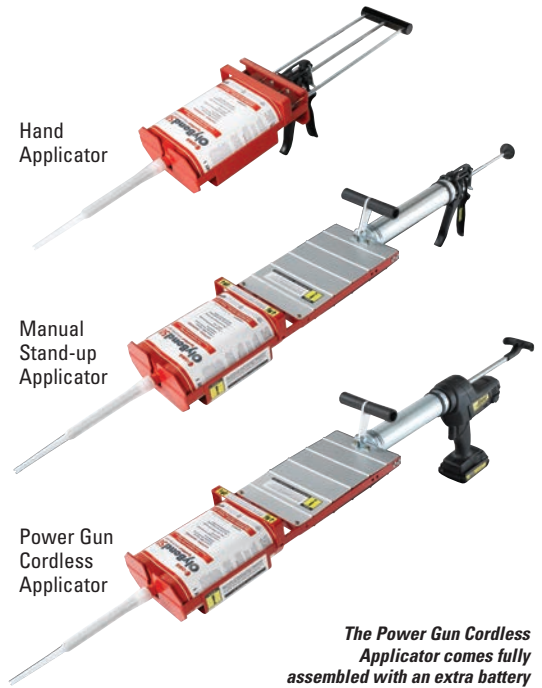

- Lightweight and easy-to-use
- Great for repair work or small areas
- Inexpensive and in stock at major roofing distributors

MANUAL STAND-UP APPLICATOR

- Lightweight and portable
- Stand-up application reduces worker fatigue while increasing production

POWER GUN CORDLESS APPLICATOR

- Comes fully assembled and with heavy duty carrying case
- Includes two (2) 18 volt Lithium Ion batteries (LIB) and a 110 volt charger
- Includes integrated battery charge indicator gauge, and can be charged in 30 minutes, 50% faster!
- Easy-to-use and operate

The Power Gun Cordless Applicator comes fully assembled with an extra battery and a convenient carrying case!
