### **OMG PaceCart 3 for Dispensing OlyBond Adhesives Helps Drive Rooftop Productivity with Up to 120 Squares per Hour**

**AGAWAM, Mass., May 2019** – OMG’s PaceCart 3, the exclusive equipment for dispensing OlyBond500 Insulation Adhesives, can help enhance rooftop productivity with the capacity to dispense enough OlyBond500 to apply up to 120 squares of insulation per hour – twice as fast as before!

“Time studies have shown that the PaceCart 3’s dispensing capacity is among the best in the roofing industry. We designed the PaceCart with the contractor’s time and resource constraints in mind, and since upgrading the equipment with more robust and faster pumps, we’ve seen great productivity improvements,” said Adam Cincotta, business unit leader of OMG’s adhesive business.

PaceCart 3s feature two highly-reliable and robust pumps specifically designed for use with high viscosity liquid such as OlyBond500, which has had a positive impact on the dispensing capacity. In addition, the PaceCart 3 includes several other features that help

improve job-site productivity including an easy-to-use, ergonomically designed, manifold, which is easy to maintain and does not require greasing, so it simplifies start-up and shut-down procedures for additional time savings.

Other PaceCart 3 enhancements include a simplified electrical system with an easy-to-read voltage meter so contractors know when power is insufficient, color-coded adhesive trays to help prevent cross contamination of Part 1 and Part 2 components, and a built-in generator shelf for improved cord-free mobility on large projects (generator not included).

“The product upgrades, combined with 120 squares of dispensing output per hour, help make the PaceCart 3 the preferred choice of many professional roofers when applying two component adhesives,” said Cincotta.

Headquartered in Agawam, Massachusetts, U.S.A., OMG Roofing Products is a leading global supplier of commercial roofing products including specialty fasteners, insulation adhesives, engineered edge metal systems, roof drains, solar anchors as well as productivity tools such as RhinoBond. The company’s focus is delivering products and services that improve contractor productivity and enhance roof system performance.
