New 5- & 6-Inch SpeedTite Drains Available -- Full line of 3 - 6-Inch Drains Accommodate Most Applications--

AGAWAM, Mass., June 10, 2020 – OMG Roofing

Products has expanded its popular line of OMG SpeedTite® Roof Drains to include 5- and 6-inch sizes. With these additions to the existing line of 3- and 4-inch drains, the company now offers a full-range of SpeedTite Drains to accommodate most roofing applications.

SpeedTite Roof Drains are “drop-in-ready” from the box and can be installed in seconds, making them some of the fastest installed roof drains for new or retrofit roofing applications.

Contractors simply insert the drain stem into the existing drain leader and hand-tighten the wing-nut on top of the integrated vortex breaker to create a symmetrical watertight seal. Since no special tools are required, the SpeedTite Drain installs in half the time of other insert drains for enhanced contractor productivity. It is also significantly faster than re-working a drain, which can take up to two hours of time.

“SpeedTite drains feature OMG’s exclusive and revolutionary built in vortex breaker technology that gets water off the roof faster than many traditional roof drains,” said Dan Genovese, product manager for OMG Roofing Products. “Plus, SpeedTite Drains can be installed in minutes without any special tools, helping contractors save time and labor. It’s a win-win for roofing contractors and building owners alike!”

SpeedTite Drains are installed from the rooftop so the installation process will not disrupt building occupants. The one-piece seamless body and heavy duty cast aluminum strainer dome and clamping ring provides strength and durability for long-term performance. Additionally, the 10-inch long drain stem accommodates most existing conditions however it can be shortened in the field to accommodate elbows or bends in the drain leader. An extra-large flange allows positive attachment of roof flashing membrane, and flanges are also available with TPO or PVC coatings for directly attaching the flashing membrane.

Headquartered in Agawam, Mass., OMG Roofing Products is a leading supplier of commercial roofing products featuring specialty fasteners, insulation adhesives, drains, pipe supports, edge metal systems and productivity tools. The company’s focus is delivering products and services that improve contractor productivity and enhance roof system performance.
