

Gutter RetroDrain

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

Its unique dimensions allow the Gutter RetroDrain to be installed within 9-in. wide box type gutters, near parapet walls or other tight areas. A U-Flow Mechanical Seal provides a proven connection with the existing drain leader. Available in 3-in. and 4-in. sizes.

FEATURES & BENEFITS

- Pre-punched, .080-in. thick 8-in. x 8-in. aluminum drain flange.
- Strainer dome constructed of .065-in. thick aluminum and is 8-in. in diameter.
- Includes a 6-in. diameter, .125-in. thick, low profile, aluminum clamping ring that provides a tight compression for terminating for the roof system. The clamping ring is secured to the drain body with stainless steel studs.
- Incorporates the original U-Flow Mechanical Seal which exceeds the ANSI/SPRI Standard for back-flow pressure.
- Designed to accommodate tight field conditions.
- Saves time and money by allowing easy installation from the rooftop without disturbing occupants.

APPLICATION

OlyFlow® RetroDrains are designed to replace existing drains in reroofing applications. Installed from the roof surface, OlyFlow RetroDrains are engineered to be installed without removing the existing plumbing or fixture while providing a watertight connection to the roof system and the existing plumbing.

APPROVALS & STANDARDS

ANSI/SPRI RD-1 is a national performance standard for retrofit roof drains. While most retrofit drains are not tested to this standard, OlyFlow Insert Drains – including the Gutter RetroDrain – exceed the standard, which requires that the seal hold a 10-ft. column of water for 24 hours without leaking.

PHYSICAL DATA

The data below is constant for all OMG Gutter RetroDrains.

DRAIN BODY		SEAL	
.080-in. thick aluminum		U-Flow Mechanical Seals require a U-Flow Screwdriver for installation.	
FLANGE		STRAINER DOME	
8- x 8-in.		8-in. diameter, made of .065-in. thick aluminum	
STEM		CLAMP RING	
10" length		.125-in. thick low profile aluminum
