Installation Guide for
SecurEdge 300 EdgeBox RI
Installation Guide for SecurEdge 300 EdgeBox RI

NOTES:
#1 - Isolate all metal parts from ACQ treated wood or other galvanically incompatible material with appropriate membrane material.
#2 - Appliance attachments, such as lightning rods, signs, or antennae that penetrate the water seal, induce a galvanic reaction, or otherwise compromise the effectiveness of the roof edge system, shall be eliminated or isolated to prevent problems per section 8.0 of ANSI/SPRI/FM4435/ES-1. Appliances shall be isolated from or not attached to the roof edge system. Consult the lightning protection system manufacturer for specific attachment instructions.

PRE-DRILL WITH 3/16-IN. DRILL BIT FOR MASONRY CONDITIONS.
CONTACT US FOR APPROPRIATE RECOMMENDATIONS NEEDED TO MEET/EXCEED ANSI/SPRI/FM4435/ES-1 DESIGN CRITERIA

A. Top Section
10-ft. Lengths
B. Bottom Section
10-ft. Lengths
C. End Cap Insert
Slides into exposed end of bottom section
D. #14 X 1 1/2-in. Universal Fastener
Included and required
E. #14 HD Roofing Fastener
Size varies based on height of EdgeBox
min. 1-in. penetration required
F. EdgeBox Spine
Required for face greater than 6-in.
G. Finish Strip
Parallel to deck flutes (required for metal deck)
H. Closure Strip
Perpendicular to deck flutes (required for metal deck)
STEP 1: Installing Closure Strip & Finish Strip
Required for metal deck only. Place appropriate strips on the edge of the metal deck. Secure in place with #14 x 1½-in. universal fastener (5 per 10-ft. section). Fastener heads not to interfere with bottom sections.

STEP 2: Installing Bottom Section
Starting at the corners, place bottom sections as shown above working from the corners to the center. Secure in place using provided #14 x 1½-in. universal fasteners through pre-punched holes (10 per 10-ft. section). Butt adjacent sections.

STEP 4: Installing End Caps
Place end cap in exposed end of bottom section, secure with provided #14 x 1½-in. universal fastener (2 per end cap).

STEP 5: Installing Top Section
Starting at the corners, place top sections as shown in FIGURE 5. Working from the corners to the center, consider lengths of middle pieces prior to cutting to avoid creating relatively short sections (less than 5-ft.). Secure top to bottom using #14 X 1½-in. universal fastener through pre-punched holes in the face (10 per 10-ft. section), and through pre-punched holes in the back (10 per 10-ft. section). Install the #14 HD Roofing Fasteners through the pre-punched holes and into the substrate. Minimum 3 HD fasteners required for 10-ft. section. Butt adjacent sections.
