

## PRESS RELEASE

### **OMG Roofing Products Unveils OlyGlu™ TPO/EPDM Canister Membrane Adhesive for Superior Roofing Productivity**

**AGAWAM, MA – November 11, 2025** – OMG Roofing Products, a division of OMG Building Products LLC and a leading manufacturer of commercial roofing accessories and productivity tools, is excited to introduce OlyGlu™, a new family of membrane adhesives designed for superior performance and superior productivity. The initial product in this line, OlyGlu TPO/EPDM Canister Membrane Adhesive, offers a revolutionary product designed to easily and efficiently adhere smooth back TPO and EPDM membranes to the most common substrates in commercial roofing. OlyGlu TPO/EPDM Canister is ideal for new construction, re-roofing, and service applications. When you are using OlyBond500 for insulation attachment, OlyGlu is the perfect way to complete your system with a single, trusted system from OMG.

"OlyGlu TPO/EPDM Canister is a disruptive addition to the roofing industry from OMG," said Eric Frazier, Sr. Product Manager. "Its ability to be applied in cold weather down to 20°F, fast flash time, and the choice of two canister sizes is just part of the story. What we're really excited about is the industry's first inclusion of a spray wand and hose with every canister, providing roofing professionals with unparalleled flexibility and efficiency on the jobsite."

OlyGlu™ TPO/EPDM Canister is a fast-acting, single-component, two-sided membrane adhesive. It is available in a full-size canister for larger projects and a small, easy-to-carry canister for service work or smaller jobs, offering ultimate flexibility for roofing professionals.

#### **Features and Benefits:**

- **Two Convenient Sizes:** A full-size canister provides up to 10 squares of coverage for smooth back membrane, and a small canister provides up to 3 squares for smaller jobs and service work.
- **Spray Wand Included:** Increasing efficiency on the job, OlyGlu reduces downtime by including the required spray wand and hose in every box. This eliminates the need to remove and clean the spray wand and hose after the tank has been emptied, saving time.
- **Year-Round Application:** The adhesive can be applied in temperatures as low as 20°F (-6°C) and rising, allowing for year-round use.
- **Ultimate Flexibility:** Unique formula offers a fast flash time and an extended open time.
- **Improved Productivity:** Offers fast start-up and shut down, can be applied with minimal overlap for faster application, and is easier to use than traditional bucket bonding adhesive.
- **Low Volatile Organic Compound:** Low VOC adhesive under 250 g/L.
- **Versatile Application:** Adheres smooth back TPO and EPDM membranes to a wide array of common roofing substrates, including various polyisocyanurate boards, DensDeck, Securock®, OSB, and properly prepared modified bitumen.

#### **Ordering Information:**

- **OlyGlu TPO/EPDM Canister:** OG-TANK
- **OlyGlu TPO/EPDM Small Canister:** OG-SMTANK
- **Adhesive Cleaner for Use With OlyGlu:** OG-CLEANER

OMG Roofing Products is a leading U.S. supplier of roofing fasteners, roof insulation adhesives, retrofit roof drains, pipe supports and rooftop productivity tools. Our products are available nationwide through a network of roofing distributors, and supported by our national network of direct factory sales representatives.
